Final Project: Digital Exhibit Proposal

- Write a paragraph describing your digital exhibit. What topic does your exhibit seek to explore? What is the overarching narrative, or theme, of your exhibit? What format (Adobe Spark, TikTok, etc.) is your exhibit? Will your topic allow you to make connections to two items from other cultures?

Final Project: Digital Exhibit

To read/look at:

- Sample exhibits, University of Delaware: https://exhibitions.lib.udel.edu/
- Sample exhibits, Library of Congress: https://loc.gov/exhibits/

Materials

- A laptop, phone, or tablet
- Credible library and internet resources

Instructions

- Create a digital exhibit that explores an issue or topic or tells a story. Exhibits must include:
    - At least eight primary sources that are each accompanied by exhibit text of approximately 100-150 words that compellingly contextualizes the source with additional background information and describes how the source contributes to the story, issue, or topic.
        - Two primary sources of the eight must belong to a cultural context that differs from that of the primary subject. For instance, if pepperoni rolls are the topic of an exhibit, then similar food items from other cultures that may have contributed to the creation of the pepperoni roll or that the pepperoni roll has impacted should be included.
    - Introductory and conclusion paragraphs of approximately the same length as the exhibit text for items are required.
    - Citations for images and information used from external sources.
- The exhibit may be created in an Adobe Spark page, which allows for embedded media, linking, and interactivity, or any other similar platform with which you may be comfortable, such as TikTok, Instagram, or Twitter.
- You will submit the URL or instructions for accessing your project to the Final Project Blackboard assignment.
